

More Data for 2025-2026 End of Season Review

We're just the two race days in with the upgraded Elite Combo algorithm.

Five Elite-Combo winners from seven betting races and the bank has leapt 17.9%.

At the same time, Nationwide-Best bets have increased the bank by 8.6%

Along with the five Elite Combo winners came only one 2nd/3rd placegetter. That has already begun straightening up the 2nds/3rds v Winners 2026 discrepancy that we explained in last week's newsletter.

You can easily identify and analyse the track condition/distance ranges as per this newsletter;

Here are some of the fields that you can filter and analyse by:

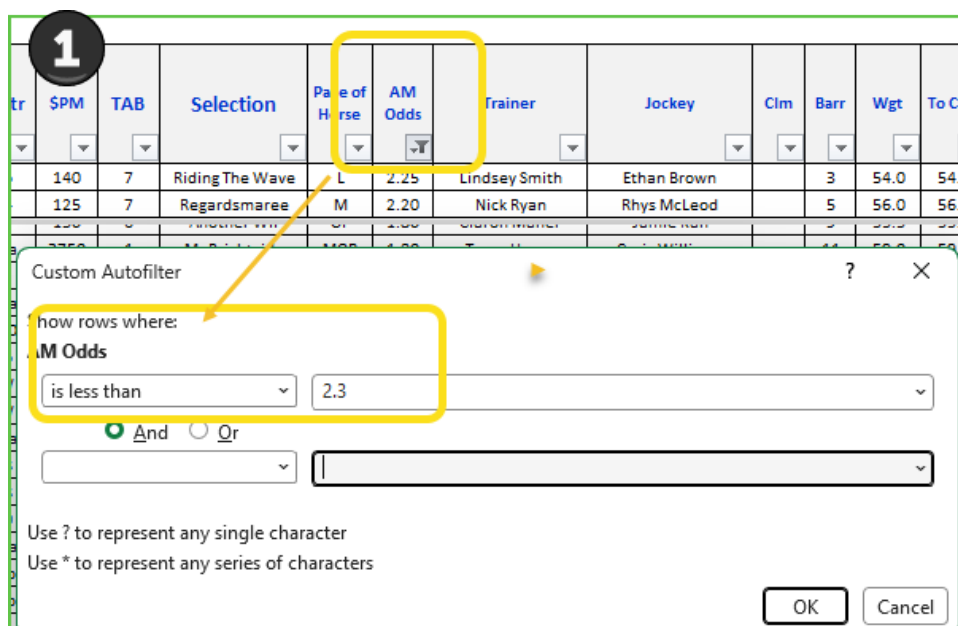

Date, Track, Time, Rated To, Rail, Race #, Distance, Type, Restricted?, \$P-Money, TAB#, Selection, Pace of Horse, AM Odds, Trainer, Jockey, Claim, Barrier, Weight Allotted, Weight to Carry, Top-2 Rated AM odds %, Scenario Order, Form Order, Rated Order, Elite Rated Odds, Pro-Strategy Original \$4k Bank, Starters (Mel), Finishing Position (1-2-3), Odds (Top-Flucts in Official Betting), Place Div. (mid Tote).

Filter Example:

This is a simple filter, applied in about 10 seconds:

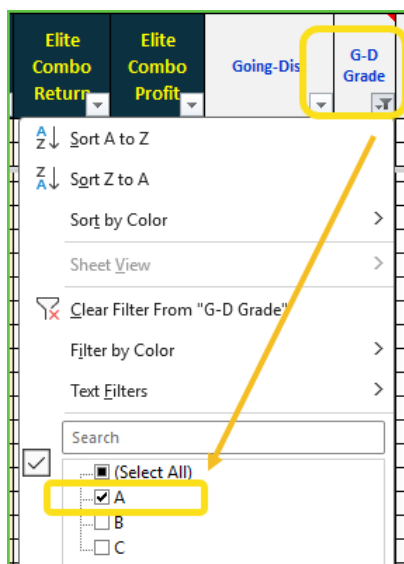

1) Horses with AM Odds of \$2.30 or less.

Click on drop-down menu, number filters, 'is less than', \$2.30

2) Going-Dist Grade = "A" (ie; Going <6 and Dist less than 1700).

Click on drop-down menu, check "A" and uncheck B and C.

In a millisecond, the answer is calculated and presented in a clear, simple summary:

Current Intro-Pak

We quite often receive queries from members that have been answered in the Intro-Pak. It is available online and is essential reading for new clients.

[Elite Intro-Pak 2026](#) PDF (July 2026)

Raceday Emails

You always have three options for checking the race-morning information. Online (*Members area, smart-phone and email*). [Smart-Phone Directions](#).

On occasions there could be a third-party email-server problem which could prevent the raceday information from arriving by email.

The information is always online in your member area. **Please keep your access details handy just in case.** There is no one in the office to handle late raceday queries after 11:00am (EST) raceday.

Why only the one, current algorithm, spreadsheet?

1. It is confusing to present results from a superseded algorithm. Members want to be able to plan ahead, sourcing data that is 100% relevant.
2. All the past race days are archived online and can be accessed and audited by any member.
3. We are on a mission to simplify everything - providing more than one spreadsheet is confusing.

Thanks for all the great feedback. We are quickly building up pace (and our banks) to really get stuck into the new racing season coming up.

Regards

Larry and Richard
