

Got What It Takes?

Professional punting is not for the faint hearted.

It requires unwavering confidence, discipline, and resilience.

Here is a printout of all Elite Combo bets since January 2021:

[Elite Combo Bets 2021-2026 to Aug 15th 2026](#) - PDF to August 15th, 2026.

The Elite Combo is a very strong long-term winning plan. There are 68 months of results and over 1800 bets recorded.

A \$10k bank has **averaged \$1700+ net profit per month**.

But if you study the results printout, you will find **nearly twenty occasions where the bank gave up 10% or more** in one of those irritating, frustrating losing periods.

Period	Bets	Winners	Bank Drawdown	Note
Feb-21	23	5	\$1,696	Then + \$3762 in March
Nov-21	24	2	\$1,655	Then + \$5183 Next 5 Race Days
Jan-22	8	0	\$1,070	
Aug-22	9	0	\$1,310	
Dec-22	8	0	\$1,090	
Feb-Mar 23	16	1	\$1,560	Then + \$3122 next 3 weeks
Aug-23	7	0	\$1,040	
Dec-23	15	2	\$1,060	
Feb-24	8	0	\$1,150	
May-24	20	2	\$1,990	Then + \$2,100 next raceday
Nov-24	22	1	\$2,140	Then + \$2885 next 3 weeks
Jan-25	9	0	\$1,080	
Mar-Apr 25	26	5	\$1,385	
Jul-25	15	1	\$1,198	
Nov-25	10	0	\$1,160	
Apr-26	16	2	\$1,400	
May-Jun 26	18	3	\$1,020	Then Jun 13th-Aug 1st + \$2,917
Aug-26	16	1	\$1,560	

It is interesting to note that, in the Apr-26 \$1400 losing period, there were 2 winners but six 2nds/3rds. In the recovery period (Jun-Aug 1st) there were 12 winners and just seven 2nds/3rds.

In the current run, there is just 1 win but 9 came second or third.

Tarzing was the most recent in the last at Rosehill. J-Mac rode him well and after a battle down the straight with a couple of others, he just got the upper hand coming to the winning post. But then comes

the 20/1 shot to blow him out.

That's racing. Good tip, backed in from \$3.50 to \$2.80 and beat them all - bar one roughie.

Two Bets in a Race

Melbourne had three races with dual Elite-Combo bets on Saturday.

Some members don't like betting on more than one horse in a race. We can understand this but the rationale that 'one has to lose' is a bit naïve.

Members have the choice to leave the race alone or maybe bet on the higher rated selection or the longer-priced or any other elimination criteria they land on using the spreadsheet to analyse.

Two suggestions.

- Read the Don Scott books (Winning, Winning more etc.) where this famous pro explains in depth backing multiple horses in a race.
- Study the Elite-Combo results – actually, we'll do that for you.

Of the 1800+ Elite Combo bets (2021-2026) **556 were in two-bet races.**

[Elite Combo 2 in race 2021-2026 to Aug 15th 2026](#) – PDF

So, **278 Elite Combo races had two bets. About 1,300 races had just the single bet.**

The 182 two-bet-race winners equate to **65% winning 2-bet races.**

Two Bets Per Race Net profit 2021-2026 is \$28,633 (>\$400 net per month).

Rated Position (Mel or Syd pro-sheets) **in the Two-Bet races.**

Top-Rated : 76 winners from 237 bets (32% @ \$4.01). Profit: + **\$9,323.**

2nd Rated: 78 winners from 242 bets (32% @ \$4.65). Profit + **\$14,321.**

3rd Rated: 28 winners from 77 bets (36% @ \$4.49). Profit + **\$4,989.**

Rated Position (Mel or Syd pro-sheets) **in SINGLE-Bet races.**

Top-Rated : 318 winners from 782 bets (41% @ \$3.70). Profit: + **\$56,778.**

2nd Rated: 150 winners from 416 bets (36% @ \$4.26). Profit + **\$28,656.**

3rd Rated: 23 winners from 67 bets (34% @ \$5.12). Profit + **\$7,728.**

Betting Opt-In Levels

Members ask, what **minimum AM odds** do you suggest as the best cut-off point.

In the Intro-Pak and occasional newsletters, we list \$2.30 as the most appropriate min AM odds. That arbitrary AM-Odds cut-off point is simplistic, especially considering the wealth of extra information that came from the July 2026 Elite-Combo review.

We are investing a lot of time in providing a more sophisticated cut-off than simply \$2.30 AM odds. This came about thanks to feedback from some very astute members as well as the further in-depth analysis of the revised bet-scale.

The post-revision Elite-Combo bet-scale is much more accurate. However, we have discovered that some of the lower range bets – especially less than 1.5% - can be identified with varying degrees of vulnerability when previously under-utilised variables like the speed-map are against them.

Taking all this into account, we see an opportunity to provide some sort of a ‘vulnerability scale’ which can replace the arbitrary \$2.30 min odds cut-off point with a flexible set of opt-in levels.

More to come...
